**AUSTRALIA'S LEADING
MANAGED SECURITY SERVICE PROVIDER**

ABOUT SECCOM GLOBAL

Seccom Global (Seccom) is one of Australia's fastest growing providers of information security services. It is a privately owned and funded company that has experienced strong growth with each year. Our head office is based in Sydney, with Data Centre capacity in both Melbourne and Sydney.

Seccom was founded in 2003, filling a void in the market at that time. The internet was fast becoming an indispensable tool for business, however, while these organisations recognised that Internet Security and Inter-office Connectivity were vital, managing these services was not their primary focus. Many businesses did not have the knowledge and expertise to use this tool securely and efficiently and that is where Seccom is able to assist.

A Seccom Managed Solution provides our customers with a comprehensive solution, tailored to meet the needs of their individual business. The solution is continually monitored from the Seccom Security Operation Centre (SOC) where the latest attack definitions, patches and firmware updates (pre-tested) are applied. The SOC provides 24 x 7 technical email and phone support and proactively manages our customer solutions.

VISION AND STRATEGY

At Seccom Global, we aim to maintain our lead in the market by continually investing in research and development. This continued investment enables us to develop solutions that provide our customers with a distinct business advantage over their competition.

We are in an era that requires business to be carried out independent of time or location. Business connectivity and security has now become a critical component in how we conduct business. As companies strive for efficiencies and greater market share, more emphasis is being placed on social networking and electronic media. Our aim is to assist you in the implementation of these technologies, as well as facilitate their secure and successful utilisation.

CORPORATE OVERVIEW

Seccom Global is a Managed Security Service Provider who differentiates itself from the market through their innovative set of secure products. Our focus is predominantly on deploying and supporting advanced solutions that enable the improvement of communications and productivity, while reducing ownership costs. We achieve this through the design, implementation and support of appropriate and effective information technology solutions. We bring to our clients a broad experience in data and security communications.

Seccom is one of the very few organisations who can provide visibility, security and compliance from Pop to Port on a global scale. As an SISP (Secure Internet Service Provider) we are distinguished by providing our clients with CLEAN bandwidth. We filter out the viruses and Internet based threats in our Data Centre and in the cloud services, achieving a delivery of clean bandwidth to our clients. Our solutions are all managed from our 24 x 7 Security Operations Centre, and include:

- ✓ Fully Managed Security and Switching Services
- ✓ Automated office disaster recovery and backup solutions
- ✓ A complete range of in the cloud solutions
- ✓ Forensic monitoring and analysis

Seccom's solutions can be tailored to meet changing economic requirements and are likely to be delivered at a lower cost than your existing solution.

SECCOM'S VALUE

We pride ourselves on being better through constant innovation. We consistently strive to lead the market by listening to our clients and looking for solutions to assist them to be better at what they do. This allows us to deliver value for money, quality services. With Seccom as your business partner, you get:

- ✓ Commitment to excellence
- ✓ A trusted security advisor and partner
- ✓ Internationally positioned technical resources
- ✓ Multi-Vendor 24 x 7 support

Our aim is to provide all our clients with a positive outcome. We believe business is successfully built around win/win solutions and long lasting relationships. We don't aim to deliver good service – we aim to deliver exceptional service.
